May 23, 2022

The wiring harness upgrades to the Titan Connect™ body packages show that Auto Crane continues to strive to be the premium brand in the industry.

As a portion of the Titan Connect body installation, each upfit facility will be required to purchase Part Number 475300361, Dealer Titan Connect Kit. This kit contains a 5" touchscreen, a harness adapter and a cable for programming the Titan Connect software and the Power on Demand™ system

The benefits of programming with the LCD screen include customizing the engine start/stop system to work with each specific chassis make and model; customizing crane and compressor timers to meet specific customer needs; reduce troubleshooting times by using the diagnostic screen; easily download software updates and export data logs to review historical activities and share with tech support to reduce diagnostic times.

Thank you for your continued business. We remain dedicated to serving our dealer network for the mutual benefit of our shared customers and genuinely appreciate your dedication to the Auto Crane brand. Please contact us should you have any questions regarding this bulletin.

Respectfully,

Brian Welborn

Product Manager
